Top technical skills

Languages: TypeScript, JavaScript, Java, C++, C#, PHP, Python
Database: PostgreSQL, Oracle DB, Microsoft SQL Server
Other: Google Cloud, CI/CD pipelines, React.js, Claude, Docker, Spring Framework

Work Experience

Web Developer Intern | Konstruct Digital | 2026/Jan – Present

(Calgary, Canada)

Technologies: Claude, WordPress, JavaScript, PHP, CSS, Python

- Built a centralized AI Slack agent on Google Cloud (ADK) that unified multiple internal workflows into a single interface, enabling context-aware requests across company systems and reducing tool switching and workflow fragmentation
- Leveraged AI tools (e.g., Claude) to accelerate development, reducing task completion time by ~40–50% while validating outputs for correctness, and ensuring scalability, and system compatibility
- Enhanced day-to-day company workflows by building API-driven automation tools and CI/CD pipelines with PHP and Python, streamlining client website management, automated 404 monitoring, reporting, and Slack notifications across hosted sites.
- Collaborated with 3+ cross-functional teams to clarify requirements upfront, reducing rework on assigned tasks by ~20%

Backend Software Developer | NIC, Inc. | 2022/Jan –2023/Mar (Tokyo, Japan)

Technologies: Java, Spring Framework, Oracle DB

- Conducted root cause analysis of bugs in an international banking system, resolving 30+ issues by modifying backend code and optimizing SQL queries to align with system requirements.

Volunteer Experience

Volunteer Developer | Calgary Japanese Community Association | 2024/Dec – Present

(Calgary, Canada)

Technologies: AI agent, CI/CD, Google Cloud, WordPress, CSS, WooCommerce,

- Built an ADK-based AI agent integrated into a community website and a CI/CD pipeline using Cloud Build and Cloud Run with IAM and secrets.
- Integrated an online membership/donation payment system, replacing manual payments and handwritten data entry, improving processing efficiency by 80% and reducing administrative errors.

Volunteer Full-Stack Developer | Empowered Futures | 2025/May – 2025/Dec (Calgary, Canada)

Technologies: TypeScript, Next.js, Tailwind CSS, GraphQL

- Developed a reusable authentication component that integrates multiple OAuth providers, reducing future integration time by 30%.

Education & Credentials

Diploma of Software Development | Bow Valley College | All Credits Completed in 2026/Apr

Oracle-certified professional Java developer | Obtained in 2022/Sep

Master's Degree in Mineral Resources Engineering | Hokkaido University | Completed in 2019/Mar
